NODEFOX · ILLUSTRATIVE OPERATIONAL OUTPUT

From invoice to approved record

Synthetic sample for workflow evaluation. No live system was accessed and no operational action was performed.

Prepared result

AP-2048 · review completed

Supported amount: $4,104

Held amount: $216

Payment release: separate authorization

Source records

- INV-2048 · Northstar Supply
- PO-7301 · 240 units at $18
- Invoice total · $4,320
- Received · 228 units

Reference context

- PO-7301: 240 authorized
- GR-918: 228 accepted
- 12 units awaiting receipt

Validation

- Invoice quantity exceeds receipt
- 228 × $18 = $4,104 supported
- Route remaining $216 to review

Human decision

- AP reviewer sees invoice + receipt
- Approve $4,104 for AP preparation
- Hold $216 pending receipt

Execution evidence

Input → AI interpretation → reference lookup → exact validation → human decision → prepared output.

This website fixture demonstrates the proposed output structure. It is not a native NodeFox audit export, a customer outcome or a legal determination. Recorded-state inspection does not repeat model calls or external writes.
