NODEFOX · ILLUSTRATIVE OPERATIONAL OUTPUT

Invoice reconciliation

Synthetic sample for workflow evaluation. No live system was accessed and no operational action was performed.

Prepared result

AP-6092 · payment-ready record

Matched amount: $2,400

Evidence: invoice + PO + receipt

No payment instruction executed

Source records

- INV-6092 · Cedar Components
- PO-6008 · 96 units at $25
- Invoice amount: $2,400
- Receipt reference: GR-902

Reference context

- PO-6008: $2,400 authorized
- GR-902: 96 units received
- Duplicate check: no prior invoice

Validation

- Supplier and currency match
- 96 × $25 = $2,400
- Three-way match: passed

Human decision

- AP owner reviews match package
- Approve payment-ready preparation
- Treasury retains payment release

Execution evidence

Input → AI interpretation → reference lookup → exact validation → human decision → prepared output.

This website fixture demonstrates the proposed output structure. It is not a native NodeFox audit export, a customer outcome or a legal determination. Recorded-state inspection does not repeat model calls or external writes.
